

School Leadership in Clean Energy (SLICE)

Generation180 supports a network of K-12 school leaders who are advancing clean energy adoption in their schools and communities.

Join us as a School Leader in Clean Energy!

Gilbert Rosas
Director of Sustainability
and Adaptation
Modesto City Schools, CA

- Led adoption of over 13 MW of solar and 50 electric school buses in 2 districts
- Secured \$39M+ in grants and federal tax credits
- Serves on national advisory councils

Benefits of Joining the Network

Gain public recognition

Generation180 shares members' success stories with press, on social media, and at conferences.

Grow as a leader

Network members receive resources, support, and training to advance clean energy adoption at their schools.

Connect with other leaders

Network members are given opportunities to connect, share, and learn from other school leaders.

Engagement Opportunities

Members choose how they want to engage in the network

Share

- Showcase your schools' clean energy projects through storytelling opportunities created by Generation180.
- Participate in facilities tours, events, and conferences to share your clean energy experience.
- Share your clean energy story and experience with peers, media, and the general public.

Learn

- Join network trainings and events convened by Generation180.
- Receive a monthly email newsletter with the latest news and resources for schools.
- Obtain resources, updates on funding opportunities, and support for continuing to advance clean energy technologies at schools.

Connect

- Mentor other school leaders to adopt clean energy and join the network.
- Connect with peers leading on clean energy through quarterly virtual network meetings and a private Google Group.
- Join a movement for clean energy at K-12 schools and network with supporting organizations.
